17 January 2020

TO: REGISTERED DENTAL PRACTITIONERS

BE A HEART SAFE DENTAL PRACTITIONER AN INITIATIVE TO ENCOURAGE THE USE OF AED

All Dental Practitioners (i.e. Dentists and Oral Health Therapists) are required to attain the Basic Cardiac Life Support (BCLS) certification for the renewal of their Practising Certificate (PC) biennially.

2 The Singapore Resuscitation and First Aid Council (SRFAC) has announced in July 2018 that from 1st June 2019, all existing BCLS Training Centre (TC)/ Instructor Training Centre (ITC) will transit to the BCLS+AED training track.

3 An Automated External Defibrillator (AED) is used as a complementary aid to support BCLS to increase out-of-hospital sudden cardiac arrest survival rate. The use of AED benefits patients, staff and anyone within the vicinity of the clinic by increasing the readiness of attending to such cardiac arrest situations.

4 The Singapore Dental Council (Council) is pleased to share that The Singapore Heart Foundation (SHF) will be providing two complimentary BCLS+AED certification training places for every AED installed and registered in the "National AED Registry" by any primary care medical and dental clinics. This complimentary offer is valid until 31 March 2020.

5 Please visit <https://www.myheart.org.sg/programmes/aed-in-clinics-initiative/> or contact SHF at cpaed@heart.org.sg for more details.

Thank you.

Yours sincerely,
